1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, there is no antecedent basis for "the input signal", "the full range", and "the AC component".

Claim 2, there is no antecedent basis for "the full range" and "the AC component portion".

Method claim 3 is vague and indefinite because it can not be dependent on apparatus claim 2.

Claim 4, there is no antecedent basis for "the span", "the system input", the entire input signal range", and "the converter's span".

Claim 5, there is no antecedent basis for "said output terminal of said analog to digital converter" and "said input terminal of said analog to digital converter".
